

Drowning in Huge DWP bills?

**Stop
wasting
\$\$\$ on leaks
and running
toilets!**

**Call Mike, the water whisperer and you can now
save big \$\$\$ and conserve a precious resource!!**

Twice a week, one of our trained techs will read your water meter to ensure that your usage is normal.

Why wait for the bi-monthly bill to discover that you have leaking faucets or running toilets that can add huge charges to your bill.

For only \$95 a month, you will receive your weekly readings which will tell you exactly how much water you have been using, and if it is under the amount targeted.

If our tech has a reading over the target, they will notify you and your property manager immediately, so the problem can be addressed.

Depending on the size of your building, using our service can typically **reduce your bill at a minimum of 20%** and probably more. **Ensure that you never get a horrible surprise in your bill again!!!**

**Did you know
that a running toilet
can add approximately
\$450 a month
to your bill!**

**For a free evaluation and more
info, please call Mike at
310-383-1252**
